CIF Price of Anti-tracking Power Supply Systems for Telecommunication Sites Exported to Mexico

Overview

Global Import Data & Trade Data Platform | TradeindataExplore country-specific import data and export data statistics from our exclusive global trade data.

Key Takeaways

To estimate the CIF price for anti-tracking power supply systems exported to Mexico, you need the product's FOB price, shipping costs, insurance, and applicable tariffs using HS code 8504502000.Step 1: Identify the Product and HS Code

The relevant Harmonized System (HS) code for anti-tracking power supply systems used in telecommunication sites is 8504502000. This code covers power supplies for telecommunication and automatic data-processing machines, which is necessary for customs classification and tariff calculation .

Step 2: Determine FOB Price

The FOB (Free on Board) price is the cost of the product at the seller's port, excluding international shipping and insurance. This is typically obtained from the manufacturer or supplier.

Step 3: Calculate Shipping and Insurance

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

The CIF price includes the FOB price plus freight and insurance to the port of destination in Mexico. You can estimate these costs using the Incoterms® price calculator, which allows you to input product value, transport mode, and insurance to obtain a CIF estimate .

Step 4: Include Tariffs and Duties

Mexico applies import duties and taxes based on the HS code. Using trade databases such as Trade Map, UN Comtrade, or WTO Tariff & Trade Data, you can find the applied tariff rates for HS 8504502000. These rates are added to the CIF price to calculate the landed cost .

Step 5: Example Calculation
• FOB Price: $1,000 per unit (example)

• Freight to Mexico: $150 per unit

• Insurance: $20 per unit

• CIF Price = $1,000 + $150 + $20 = $1,170 per unit

• Import Duty (e.g., 5%) = $58.50

• Total Landed Cost = $1,170 + $58.50 = $1,228.50 per unit This is a simplified example; actual CIF prices depend on shipping method, insurance coverage, and current tariffs.
Step 6: Access Tools and Data
• Incoterms® Price Calculator: Estimate CIF based on FOB, freight, and insurance .

• Trade Map / UN Comtrade: Check historical export prices and volumes to Mexico .

• WTO Tariff & Trade Data: Verify applied tariffs for HS 8504502000 . By combining these steps, you can obtain a precise CIF price for budgeting or export planning.
