ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Cable tray four-way specifications and dimensions

Overview

Cable tray is considered to be a system. It must provide continuous support for cables, and the electrical continuity of the cable tray system must be maintained.

Key Takeaways

Standard depth is 4" with optional depth of 6". Model numbers are 12CTX (12" wide), 18CTX (18" wide) and 24CTX (24" wide). In practice, cable tray dimensions are a system of interrelated measurements —width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability. The Ladder Tray features light, rugged, tubular steel construction. It is designed for. association representing the major electrical equipment manufac-turers in the U. The Cable Tray ng standards, performance standards, test standards and application in this document have been tested extens ompetent professional en completely installed, without damage either to conductors or. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Cable tray systems are an alternative to wire ways & electrical conduit, which entirely protect wires. Many different types of wire can be accommodated in cable trays, including High-voltage power lines. This tray is stocked in a range of Pre-Galv and Hot Dip Galv finishes, which can also be powder coated and.
