Construction of overhead optical cable junction boxes

Overview

OPGW cable joint box installation involves several key stages: selecting the appropriate location, preparing both the cable and the joint box, splicing fibers, and sealing the joint box properly. Adhering to these steps ensures optimal performance and longevity of the. This manual is formulated in accordance with IEEE 1138 - 2008 and IEEE 524 - 1992, etc. OPGW has dual functions of aerial ground wire and fiber communication. It deals with the factors that should be considered in determining the characteristics of this type of cable, the apparatus that should be used, the precautions that should be taken in handling the reels, and. However, improper installation of OPGW cable joint boxes 1 can jeopardize the entire system. Cable entry threads are M20 x 1,5. A blankin ssemble cable through Ex-Proof Cable Gland.
