C Brackets C brackets are designed to handle heavy electrical applications and are easy to install. They provide strong support for distribution boxes mounted on wood or metal studs, making them ideal for ceiling or wall installations . F Brackets (F-Clips) F brackets are durable metal clamps that secure electrical boxes to wood studs. They provide side support to ensure the box remains stable and properly aligned within the wall . D Brackets D brackets are shaped to support ceiling fixtures such as lights and fans. They can be used with both wood and metal studs and are designed to bear the full weight of the electrical application . S Brackets S brackets are often used with raceways to support electrical boxes. They help with spacing and alignment behind drywall and include setup hooks and guide tabs for automatic positioning . VMS Brackets VMS (side-mounted) brackets attach to wood or metal studs. They are typically flat with "V"-shaped tabs, allowing easy installation and secure attachment of the distribution box . VS Brackets VS brackets are flat-mounted and can be used with wood or metal studs to secure electrical applications to walls or ceilings. They provide a stable mounting surface for various box types . VP Brackets VP brackets are designed for boxes that need to be secured directly to wall studs. They often feature side mounting with setup hooks for quick and precise installation .

Installation Considerations
• Stud Type: Choose brackets compatible with wood or metal studs.

• Weight Support: Heavier electrical boxes or ceiling-mounted fixtures require C or D brackets.

• Alignment and Spacing: S and VMS brackets help maintain proper spacing behind drywall.

• Accessibility: Ensure brackets are not concealed behind walls to allow maintenance and inspection . These bracket styles ensure that distribution boxes are securely mounted, properly aligned, and capable of supporting the electrical load safely. Selecting the right bracket depends on the box type, mounting location, and weight of the electrical components.
