ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Distribution boxes can be custom-made in various sizes

Overview

Custom Electrical Distribution Boxes and Enclosures BuiltWe support fully customized dimensions and enclosure thicknesses to ensure the box fits precisely.

Key Takeaways

Distribution boxes can indeed be custom-made in various sizes and configurations to meet specific project requirements.Customization Options

Distribution boxes can be tailored in size, shape, and internal layout to suit residential, commercial, industrial, or solar energy applications . Customization includes the number, location, and size of knockouts for wiring, as well as interior paneling, racks, or circuit breaker arrangements . Boxes can also be designed for specific electrical loads, ensuring safe and efficient power distribution .

Material and Environmental Considerations

Custom distribution boxes are available in a variety of materials such as cold-rolled steel, stainless steel, ABS, PC, PVC, and PE, each offering unique advantages for indoor or outdoor use . They can be manufactured to meet IP ratings for water and dust protection and IK ratings for impact resistance, making them suitable for harsh environments . Waterproof, explosion-proof, and portable options are also available for specialized industrial or construction site applications .

Mounting and Aesthetic Options

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

Boxes can be configured for flush mount or surface mount installations, depending on accessibility and aesthetic requirements . Custom colors and branding, including silkscreen printing, laser marking, or UV printing, can be applied to match project or brand specifications . This ensures both functional and professional presentation.

Production and Delivery

Manufacturers offer rapid prototyping and production, with some able to deliver prototypes in as little as 15 days . Orders can range from single units to bulk quantities, with options for air or sea freight for international shipping . In-house production of components like sockets and casings helps reduce costs and ensures precise fit and quality .

Applications

Custom distribution boxes are used in residential, commercial, industrial, and solar energy systems, as well as for temporary power distribution on construction sites . They can integrate smart technologies or additional protective features to meet regulatory requirements and project-specific needs . In summary, custom distribution boxes offer flexibility in size, material, protection, and internal configuration, allowing them to be precisely tailored for any electrical application while ensuring safety, efficiency, and durability .
