Does a Huawei switch have 5 ports with fiber optic cable support

Overview

Optical Fiber Two fiber connectors need to be connected using a fiber adapter. Fiber adapters are widely used in optical distribution frames Huawei 5-Port.

Key Takeaways

Typical Huawei 5-port Ethernet switches do not support fiber optic connections; they provide only RJ-45 Gigabit Ethernet ports.

Huawei's compact 5-port switches, such as those in the S110 or S220 series, are designed for home or small-office use and include five 10/100/1000 Mbps RJ-45 Ethernet ports without dedicated fiber or SFP slots . These switches are primarily Layer 2 devices for simple wired connectivity and do not offer optical port support.

Fiber Support in Huawei Switches

For fiber optic connectivity, Huawei switches use 1000BASE-X ports, 10GE SFP+ ports, or combo ports that allow either an electrical RJ-45 connection or an optical SFP module . These features are typically found in enterprise-grade switches like the S5700 or S5720 series, which provide flexible GE access ports and optional SFP uplinks. Combo ports allow a single internal forwarding port to operate as either copper or fiber, but only one medium can be active at a time .

Summary
• 5-port Huawei switches (S110/S220): Only RJ-45 Ethernet ports, no fiber support .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Enterprise switches (S5700/S5720): Support fiber via SFP or combo ports, but these models have more than 5 ports and are designed for campus or data center networks . If you need fiber optic connectivity, you would need to select a Huawei switch with SFP or combo ports, rather than a small 5-port model.
