ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Earless Fiber Optic Coupler

Overview

10 PCS LC Quadruple Ear less Fiber Optic Adapter Flange Coupler 4 Port Quad SM LC/A OM1 OM2 OM3 OM4 fconnector.

Key Takeaways

An earless fiber optic coupler is a compact adapter that connects fiber optic cables without protruding ears, supporting high-density and dustproof connections.Overview

Earless fiber optic couplers, also known as earless adapters, are designed to connect fiber optic cables such as LC or SC types without the traditional side “ears” used for mounting. This design allows for higher port density in patch panels and enclosures, making them ideal for FTTH (Fiber to the Home) networks, data centers, and high-density optical distribution frames .

Types and Configurations
• LC Earless Couplers: Available in duplex or quad configurations, supporting single-mode (SM) or multimode (MM) fibers such as OM1, OM2, OM3, and OM4 .

• SC Earless Couplers: Often dustproof and simplex, designed for active connections in FTTH deployments .

• Fused Fiber Optic Couplers: Used for splitting or combining optical signals, available in 1x4, 1x8, 1x16 configurations, and suitable for single-mode, polarization-maintaining, or multimode fibers .
Key Features
• High-Density Design: Eliminates mounting ears, allowing more adapters per panel.

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Dustproof Options: Protects fiber endfaces from contamination, improving signal reliability .

• Compatibility: Supports various fiber types and connector standards (LC, SC, duplex, simplex).

• Durability: Often made with high-quality plastic or SMC shells, with precise fiber alignment sleeves for low insertion loss .

Applications

• FTTH Networks: Connecting optical distribution networks to subscriber lines.

• Data Centers: High-density patch panels for efficient space utilization.

• Optical Test Equipment: Temporary or permanent fiber connections in lab setups.

• OCT and WDM Systems: Specialized fused couplers for optical coherence tomography or wavelength division multiplexing .

Summary

Earless fiber optic couplers provide a compact, high-density, and reliable solution for connecting fiber optic cables. They are available in multiple configurations (LC, SC, duplex, simplex, quad) and support both single-mode and multimode fibers. Their dustproof and earless design makes them particularly suitable for modern high-density optical networks and FTTH deployments .
