ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Elemental Spectrometer Update

Overview

This is the 17th Atomic Spectrometry Update (ASU) to focus on advances in elemental speciation and covers a period of approximately 12 months from January 2024. This ASU review deals with all aspects of analytical atomic spectrometry speciation methods developed for: the determination of oxidation. Our product portfolio comprises of a wide range of organic and inorganic elemental analyzers, nitrogen and protein analyzers, total organic carbon (TOC) analyzers, optical emission spectrometers, stable isotope analyzers, and software solutions. Atomic emission spectrometry; 2. Rugged on all fronts, this system needs surprisingly little bench space or user maintenance Experience. (2025) Journal of Analytical Atomic Spectrometry Vol. Royal Society of Chemistry (RSC) These are the references the publisher has listed as being connected to the article. Please check the article itself for the full list of references which may differ. Not all references are currently. Which ICP-OES/ICP-AES optical technology offers superior performance: Echelle or ORCA?

Explore the SPECTRO Resource Library for comprehensive guides, technical documents, and industry insights. Stay always informed with our expert resources.

Article Content

Atomic spectrometry update: review of advances in elemental

This is the 17th Atomic Spectrometry Update (ASU) to focus on advances in elemental speciation and covers a period of approximately 12 months from January 2024.

Product portfolio: Analyzers, spectrometers & software

Thanks to our proprietary Advanced Purge and Trap (APT) technology, even the most challenging C:N elemental ratios of up to 12,000:1 can be reliably

Revised general chapters for elemental analysis

These analytical procedures are essential for ensuring the quality and safety of medicinal products and their ingredients, as well as other articles

Elemental Spectrometers

Instruments and accessories for the quantitative determination of chemical elements within a sample. Products employ various excitation sources and include atomic

Elemental mass spectrometry for bioanalysis

Revising the great selection of different topics that have been covered in this topical collection, we strongly believe that the published

Elemental quantification using electron energy-loss spectroscopy with

Energy dispersive spectroscopy (EDS) is the typical technique normally used to measure elemental compositions in an EM. With its ease of operation EDS is efficient for the determination of

Clough, Robert; Harrington, Chris F.; Hill, Steve J.; Madrid, Yolanda ...

Title Atomic spectrometry update: review of advances in elemental speciation Journal Journal of Analytical Atomic Spectrometry Authors Clough, Robert Author Harrington, Chris F. Author

SPECTRO Resource Library | Documents & Technical

Why upgrade your XRF analyzer? iCAL 2.0 - Standardization Gets Smart. SPECTROLAB S - A True Revolution in High-End Metal Analysis. Elemental

Atomic spectrometry update: review of advances in elemental

This is the 17th Atomic Spectrometry Update (ASU) to focus on advances in elemental speciation and covers a period of approximately 12 months from January 2024.

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

OES Software | Bruker

In this live event our experts will introduce the newest product, discus its latest technology and how it advances chemical analysis to make a metallurgist''s life

Atomic spectrometry update: review of advances in elemental speciation

This review covers advances in elemental speciation by a range of coupled techniques, including HPLC-ICP-MS, HPLC-HG-AFS and GC-ICP-MS.

Atomic spectrometry update: review of advances in elemental

Abstract This is the 16th Atomic Spectrometry Update (ASU) to focus on advances in elemental speciation and covers a period of approximately 12 months from January 2023.

Atomic Spectrometry Update: review of advances in elemental speciation ...

This latest update adds to that from last year1 and complements the five other annual Atomic Spectrometry Updates: advances in environmental analysis,2 advances in the analysis of clinical and

Elemental speciation

Atomic Spectrometry Update: review of advances in elemental speciation Robert Clough, Chris F. Harrington, Steve J. Hill, Yolanda Madrid and Julian F. Tyson This is the eighth Atomic

Atomic Spectrometry Updates

Advances in atomic spectrometry and related techniques Advances in elemental speciation Advances in X-ray fluorescence spectrometry Advances

Atomic Spectrometry Update: review of advances in elemental

Abstract This is the 14th Atomic Spectrometry Update (ASU) to focus on advances in elemental speciation and covers a period of approximately 12 months from December 2020.

Atomic spectrometry update: Elemental speciation

This is the first Atomic Spectrometry Update (ASU) to focus specifically on developments in elemental speciation and covers a period of 10 months from January 2008. Other ASU reviews (1-5) detail

Atomic spectrometry update: review of advances in atomic spectrometry ...

Abstract This review of 180 references covers developments in ''Atomic Spectrometry'' published in the twelve months from December 2023 to November 2024 inclusive. It covers atomic

(PDF) Atomic spectrometry update. Elemental speciation

AI-generated Abstract This Atomic Spectrometry Update provides a comprehensive review of developments in elemental speciation over a 10-month period, highlighting the importance of

Atomic spectrometry update. Elemental speciation review

This is the fifth Atomic Spectrometry Update (ASU) to focus specifically on developments in elemental speciation and covers a period of approximately 12 months from January 2012. The International

Atomic Spectrometry Update. Elemental speciation

Abstract This is the first Atomic Spectrometry Update (ASU) to focus specifically on developments in elemental speciation and covers a period of 10 months from January 2008. Other ASU reviews1–5

Atomic spectrometry update: review of advances in X-ray fluorescence ...

There was an increase during the review period in the use of SR-XRF spectrometry in conjunction with complementary X-ray spectroscopic and imaging techniques for integrating spatially

Atomic spectrometry update. Elemental speciation

This is the fourth Atomic Spectrometry Update (ASU) to focus specifically on developments in elemental speciation and covers a period of approximately 12 months from January

Atomic spectrometry update. Elemental speciation review

This is the fifth Atomic Spectrometry Update (ASU) to focus specifically on developments in elemental speciation and covers a period of approximately 12 months from January 2012. The International

Atomic Spectrometry Updates Home

Atomic spectrometry update: review of advances in elemental speciation Robert Clough, Chris F. Harrington, Steve J. Hill, Yolanda Madrid and Julian F. Tyson This review covers advances in

Atomic spectrometry update: review of advances in the analysis of ...

This review covers advances in the analysis of advanced materials, metals, fuels and lubricants, nanostructures, ceramics, refractories, organic and inorganic chemicals, catalysts and nuclear

Atomic spectrometry update: review of advances in elemental speciation
