ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Equipment for Pipeline Cable Engineering

Overview

Pipeline installation machines and tools are engineered to excavate, weld, lift, and inspect pipelines with precision and safety. From trenching to pressure testing, these solutions ensure compliance with ISO 21809 and API 1104 standards. Large Projects - Large Responsibilities: With over 40 years of expertise, we partner with international pipeline and plant construction projects. As a world leading pipeline construction business, we. Cable pulling and handling equipment for overhead lines and underground cablesToday, our Pipeline Equipment division designs and supplies automatic equipment for the complete execution of pipeline field joints worldwide. Our solutions for welding and coating preheating, welding, heat treatments on welding seam, sandblasting and coating, increase the daily production. Underground cable and pipeline networks are essential to modern infrastructure, supporting telecommunications, water distribution, power transmission, and energy corridors. Advanced trencher technology plays a critical role in enabling faster, more precise, and cost-effective excavation for these.

Advanced Equipment for Underground Cable and Pipeline Installation

The Gaja 100 is a versatile model designed for irrigation networks, underground pipelines, and renewable energy cabling. It provides consistent trenching performance across clay,

Cable management equipment | Electronic components

Explore our range of cable mounts and find the ideal products for your project – whether you need mounts for round and flat cables or versions with a toothed or snap-in strap. Cable and pipe clamps

A Comprehensive Guide of Cable Engineering

For different cable laying construction environments and methods, different equipment is required to assist in the construction to improve construction

Cables for machine and plant construction | E & E

For decades E&E Cable Solutions have been developing and manufacturing special cables for modern machine and plant engineering, including motor connection

Comprehensive Guide to Essential Wire and Cable

From wire drawing machines that transform wire rods into various gauges to extruders that coat and insulate cables, each piece of equipment plays a critical

Offshore Cable Installation Company, Submarine

Timeast owns 601 pipeline laying barge and SE-12000 pre/post trenching excavator etc. nearly 40 sets of large scale and professional engineering equipments.

Rental equipment and engineering services

Sparrows Group''s Cable and Pipe Lay Solutions (CPLS) division offers both new-build and rental services to the global subsea pipe and cable laying industries ipe lay equipment to the energy
