Explosion-proof lights and explosion-proof lighting distribution boxes

Overview

BXM (D)8050 Explosion proof Distribution Boxes Warom Explosion proof Distribution Boxes. Modular GRP construction fitted with a variety of optional BXM (D).

Key Takeaways

Explosion-proof lighting distribution boxes are specialized electrical panels designed to safely distribute and control power in hazardous environments, preventing ignition of explosive gases or dust.Overview and Function

Explosion-proof lighting distribution boxes are engineered for environments where flammable gases, vapors, or combustible dust may be present, such as petroleum, chemical, pharmaceutical, metallurgical, and offshore industries . Their primary function is to safely distribute electrical power to lighting systems, motors, and other equipment while preventing sparks, arcs, or high temperatures from igniting the surrounding atmosphere . These boxes combine flameproof (Ex d) and increased safety (Ex e) technologies, often with compartmentalized layouts to reduce maintenance risks and improve operational safety .

Specifications and Models

Explosion-proof distribution boxes come in a variety of models and materials, including metal and flame-retardant plastic, and support different voltage levels such as 220V, 380V, and up to 690V AC or 500V DC . Common types include:

• PZ20 and PZ30 series: Terminal lighting distribution boxes

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• PZ40 and XDD(R): Electric metering boxes

• XL and GXL: Low-voltage distribution cabinets

• XZW: Comprehensive distribution boxes

• GCK, GCS, MNS: Low-voltage withdrawable switchgear cabinets These boxes are designed to be shock-resistant, durable, and energy-efficient, with modular architectures that allow customizable multi-circuit configurations .
Installation Methods

Explosion-proof lighting distribution boxes can be installed using several methods:

• Wall-mounted surface installation

• Hanging installation

• Concealed or embedded installation

• Exposed installation The choice of installation depends on the site requirements, space constraints, and accessibility for maintenance.
Safety Features and Certifications

Key safety features include:

• Anti-static coatings and anti-loosening fasteners

• Color-coded indicators on operating panels to prevent misoperation

• High-strength die-cast enclosures for mechanical integrity

• Compartmentalized layouts to isolate potential internal arcs or sparks These boxes are certified to international standards such as ATEX, IECEx, CENELEC, and NEC, ensuring compliance for Zone 1, Zone 2, Zone 21, and Zone 22 hazardous areas . They are suitable for explosive gas groups IIA, IIB, IIC and flammable dust environments .
Applications

Explosion-proof lighting distribution boxes are widely used in:

• Petroleum and petrochemical plants

• Chemical and pharmaceutical industries

• Metallurgy and steel plants

• Railways, aviation, and shipyards

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Large-scale industrial facilities and construction sites They not only protect personnel and equipment but also stabilize production processes by ensuring continuous, safe power distribution in hazardous areas .
Conclusion

Explosion-proof lighting distribution boxes are essential for safe electrical distribution in hazardous environments, combining robust mechanical construction, advanced explosion-proof technologies, and international certifications. Their modularity, durability, and safety features make them suitable for a wide range of industrial applications, ensuring both operational efficiency and compliance with global safety standards.
