ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Fiber optic handheld light source with dynamic range 35dB in stock

Overview

The KLS-35 Portable Fiber Optic Tester Light Source is an essential tool for professionals in the fiber optic industry. INNOVATIVE SELF CALIBRATION FUNCTION With its advanced self-calibration function, this portable fiber optic tool ensures accurate and reliable testing of fiber. Check each product page for other buying options. Need help?

Removable silicone cover, shockproof and drop-proof, reducing collision damage and extending service life 8. With continuous wave output and 3 modulation frequencies of 270Hz/1000Hz/2000Hz 9. It provides 1310nm and 1550nm dual-wavelength laser output for singlemode fibre measurements, which is mainly used in FTTx networks and fibre network testing. When combine with a power metre, the. A shirt-pocket size LED fiber source ideal for general testing of multimode, PCS or POF systems at 850 and 1300 nm. It provides, high accuracy and simplicity of use. With adapters for FC, SC, ST, LC and more.

KLS-35-MS Optical Fibre Tester Light Source KLS-35 FTTH

The KLS-35 Portable Fiber Optic Tester Light Source is an essential tool for professionals in the fiber optic industry. Designed for Fiber to the Home (FTTH) applications, this lightweight and portable

Amazon : Fiber Optic Light Source

Twinkle Fiber Optic Lights Engine Dual Port Dual Color,Bluetooth APP/Music Sync/Remote Control RGBW Fiber Optic Driver for All Kinds of Fiber Optic Cable/Star Ceiling (OnlyLED Light Source)

Komshine Handheld Laser Light Source Fiber Tester with LED Backlight,

Our processing time generally ranges from 0 to 72 hours, during which we carefully prepare your order for shipment. Once dispatched, the shipping time will vary depending on your location and the

FOLS-201 Handheld Fiber Optical Light Source (1310/1550nm) with

FOLS-201 optical light source is a fibre optic tester with exquisite appearance and ergonomic design. It provides 1310nm and 1550nm dual-wavelength laser output for singlemode fibre measurements,

Fiber Optic LED Test Source KI9812A | Kingfisher International

A shirt-pocket size LED fiber source ideal for general testing of multimode, PCS or POF systems at 850 and 1300 nm. It provides, high accuracy and simplicity of use.

Buy In Bulk Mini OTDR 1k+ | Alibaba

On the other hand, dynamic range refers to the tester''s ability to measure reflected light over varying distances by utilizing longer light pulses. Greater dynamic ranges allow longer fibers to be effectively

Fibershot Handheld Optical Light Source

Fibershot Handheld Optical Light Source Fibershot offers a full range of light sources for testing single-mode and/or multimode fiber networks in conjunction with an Optical Power Meter. A typical Laser

Mini OTDR D35 – 1310nm/35dB & 1550nm/33dB, 5" Touchscreen

Dual Wavelength (1310/1550nm): Enables versatile testing across different fiber types for better accuracy. Dynamic Range (35/33dB): Ensures effective fault detection and long-distance signal
