Georgia Cold Aisle Cabinet Parameters

Overview

This video was associated with the source search result. Verify technical details against current product documentation and project requirements.

Key Takeaways

Technical Parameters Complies with IEC60297-1 standard. Each cabinet has at least 42U available space, and 2 vertical PDU installation positions are reserved at the rear side. Front-rear air duct, fully equipped with 42 pieces of 1U blanking panels. This method raises the temperature of the air returning to a Computer Room Air Con itioner (CRAC) unit, which allows the unit to operate more eficiently. Row level thermal containment. ons and eliminate data center hot spots versus conventional raised floor cooling systems that manage heat loads up to 7-8kW/cabinet. The mo 1950mm H x 600mm W C2CAC04ABWPAB1*: 1950 doors can be installed in 3', 4', and 6' aisles, which mounts to the Net-AccessTM N Type and S-Type 600mm, 700m and. An aisle containment system is a simple way to improve cooling efficiency in hot aisle/cold aisle rack configurations. By creating a physical barrier between cold supply air and hot exhaust air, containment solutions prevent airflow mixing and deliver over 95% airflow efficiency under normal operating conditions. Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or.
