Gpon device light-up

Overview

When the green light of the GPON indicator is always on, it means that the GPON interface has received the downlink optical signal. LED lighting rules during power on start process All LED lights will come on in at the moment the power is turned on, and the LOS lights turned red, while the rest remained green for 0. Then the Power light remain green and all the other lights go out. GPON replaces the traditional three-tier Ethernet design with a two-tier optic network which eliminates access and distribution Ethernet switches with passive optical devices. Cisco introduces GPON with the Catalyst GPON platform. The ONT attempts to set up a connection with its upper-layer device. A connection is set up between the ONT and its. A complete multi-vendor reference for GPON/EPON OLT configuration, monitoring & troubleshooting.
