How much does a 24-core fiber optic cable with two power cables cost

Overview

Business owners planning network upgrades often want to know the fiber optic cable installation cost per foot.

Key Takeaways

A standard 24-core fiber optic cable typically costs between $1.50 and $3.50 per meter for single-mode, and $1.20 to $3.00 per meter for multimode, with additional costs for integrated power lines or armored construction.Fiber Optic Cable Pricing

The price of a 24-core fiber optic cable depends on several factors:

• Fiber Type: Single-mode (SMF) cables are more expensive than multimode (MMF) due to their long-distance performance and precision manufacturing requirements (typically $1.50–$3.50 per meter for SMF, $1.20–$3.00 per meter for MMF) .

• Cable Construction: Armored or loose-tube designs for outdoor or direct burial use increase costs, sometimes by 20–50% over standard indoor tight-buffered cables .

• Environmental Rating: Outdoor-rated jackets (PE, UV-resistant) or flame-retardant LSZH jackets add to the price .
Adding Power Cables

Hybrid fiber cables that include two power conductors are typically more expensive than standard fiber-only cables. The additional cost depends on conductor size, insulation, and whether the cable is armored. Based on industry pricing, adding power lines can increase the per-meter cost by $0.50 to $1.50 per meter, depending on specifications and protection requirements .

Estimated Total Cost

For a 24-core single-mode fiber with two power cables:

• Low-end estimate: $2.00 per meter (basic indoor cable with small power conductors)

• High-end estimate: $5.00 per meter (armored, outdoor-rated, high-quality fiber and power conductors) For a 100-meter run, this translates to approximately $200–$500, excluding installation labor and connectors. Prices may vary based on supplier, region, and bulk purchase discounts .
Key Considerations
• Installation Type: Underground or aerial installation may require armored or reinforced cables, increasing cost.

• Bulk Orders: Purchasing in bulk (e.g., >1 km) can reduce per-meter pricing.

• Pre-Terminated vs. Field Termination: Pre-terminated hybrid cables cost more upfront but reduce labor costs during installation. In conclusion, a 24-core fiber optic cable with two power cables is a specialized hybrid cable, and its cost is influenced by fiber type, construction, environmental rating, and power conductor specifications. Expect $2–$5 per meter as a realistic range for procurement.
