ZITHA TECH SPECIALTY CABLES (Pty) Ltd

How much does a single module for light rendering cost

Overview

The short answer is "between three cents and five dollars per frame, depending on what kind of frame you are rendering. " That is not a dodge — the range reflects how different a 1080p archviz still is from a 4K feature animation shot with volumetrics and motion blur. From Disney's The Mandalorian to BMW's global launch events and Nike's immersive product campaigns, LED volumes have replaced traditional green screens and become the new standard for high-efficiency, high-realism production. Animations and VR tours start around $2,000 - $2,500. Freelance hourly rates. The majority of architectural rendering prices are between $300 and $1000, with delivery times of three to four days. Moreover, pricing doesn't necessarily denote quality. It is possible that a $400 rendering could. The cost of 3D renders in 2025 ranges wildly—from as little as $200 to well over $5,000 per image. While that top end often includes complex, photorealistic visuals crafted by large visualization agencies, many clients are surprised to learn that the price tag isn't always tied to image quality. In this guide, we break down how architects estimate.
