ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Inspection Report of Complete Distribution Box

Overview

Electrical Distribution Board Inspection FormElectrical Distribution Board Inspection Form (1) This document is an electrical distribution board inspection.

Key Takeaways

A complete distribution box inspection report documents physical condition, electrical testing, safety compliance, and functional verification of all circuits and components.Key Components of the Inspection Report

1. Physical Inspection

• Verify panel integrity, mounting, and protection against corrosion or damage.

• Check clear access, housekeeping, and proper canopy or enclosure protection.

• Inspect junction boxes, switches, displays, and wiring for neatness and correct routing.

• Ensure rubber mats, door locks, warning signage, and emergency contacts are in place . 2. Electrical Testing

• Polarity Check: Confirm correct phase and neutral connections.

• Continuity Test: Measure resistance of all circuits to ensure proper connections.

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Insulation Resistance Test: Use an insulation tester to verify insulation between wires; record IR values and replace faulty insulation immediately .

• Earth Leakage and RCD Testing: Test ELCB/GFCI performance using recommended current and record trip times.

• Loop Impedance and Functional Testing: Measure earth loop impedance (Zs) and verify circuit breakers, MCB ratings, and functional operation of all circuits . 3. Safety and Compliance Checks

• Confirm correct breaker sizing, labeling, and color coding.

• Ensure no exposed live parts, proper grounding, and sealed cable entries with glands.

• Verify nearby fire extinguishers and absence of supply cable joints.

• Check for tidy wiring inside ducting and provision of neutral and grounding copper bus bars . 4. Documentation and Reporting

• Record all test results, including continuity, insulation resistance, polarity, loop impedance, and functional tests.

• Include project details, DB reference numbers, instruments used (with serial numbers), and personnel performing the inspection.

• Provide remarks for any corrective actions or maintenance required.

• Use pre-built templates or spreadsheets for structured reporting, which may include headers, formulas, and graphs for easy analysis . 5. Action Plan

• Highlight any non-compliance or defects found during inspection.

• Schedule maintenance or corrective actions.

• Ensure approval by the responsible engineer or electrical inspector before commissioning . By following this structured approach, the inspection report ensures electrical safety, regulatory compliance, and reliable operation of the distribution box, while providing a clear record for audits and future maintenance.
