ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Japan Stockpiled ONT Optical Network Terminal SFP

Overview

NTU-SFP-200 is a high-performance subscriber terminal designed for communication with higher-level equipment of passive optical networks and providing broadband access services to the end user. Connection with GPON networks is implemented via PON interface. PLANET GPN-SFP is an SFP GPON ONU device designed in compliance with the ITU-T G. It is a cost-effective GPON customer premises system that provides broadband services with 1244 Mbps upstream and 2488 Mbps downstream by connecting to subscribers' switches or routers. Its purpose is to facilitate high-speed internet and data transmission, enhancing connectivity. Advantages of ONT equipment include increased. A ZTE ONU (Optical Network Unit) with CATV (Cable Television) capability is a critical component in modern fiber-optic broadband networks, enabling service providers to deliver high-speed internet, voice (VoIP), and television services over a single fiber connection. The GPON HGU (Home Gateway Unit) incorporates interoperability, key customer specific requirements. Discover our selection of GPON, EPON, and XG (S)PON ONT/ONU devices. PON technologies, unlike Ethernet, are not P2P but one-to-many with two device types: ONU (Optical Network Unit)/ONT (Optical Network Terminal) and OLT (Optical Line Terminal). Both devices can be manufactured using the SFP form factor 1.

Buy In Bulk ZTE ONU CATV Dual-Band Wifi & Catv Support

ONT (Optical Network Terminal) The ONT is a customer-premises device that serves as the endpoint in a fiber-optic network, converting optical signals into electrical ones for use in homes and businesses.

XPON Optical Network Terminal, Beam 1K00X – PPC Broadband

Equipped with ITU-T G.984 compliant 2.5G Downstream and 1.25G Upstream GPON interface, this device supports triple-play services including voice and high-speed internet access service. It''s

SFP with PON MAC and w/o PON MAC

The OLT provides an integrated access box for Passive Optical Networks. OLTs are typically chassis with one or more line cards inside, and on each line card there

GPON ONU SFP Transceiver

The GPN-SFP is a device that integrates the functions of a traditional Optical Network Terminal (ONT) or Optical Network Unit (ONU) into a compact Small Form-Factor Pluggable (SFP) module.

MA5671A – SFP ONT (Optical Network Terminal)

The MA5671A can plug into the SFP slot of any base station, microwave baseband unit, or WiFi Access point terminals for quickest time-to-market backhaul bandwidth over fiber.

SDX 630 Series

Our next generation of multigigabit XGS-PON optical network terminals (ONTs) is here and ready to support the most bandwidth-intensive subscribers on your

Optical line termination

An optical line termination (OLT), also called an optical line terminal, is a device which serves as the service provider endpoint of a passive optical network.

What is an Optical Network Terminal (ONT)?

Discover how an Optical Network Terminal (ONT) enables fiber-optic broadband, gigabit internet, and VoIP services by converting optical signals into Ethernet

Optical Network Terminals Selection Guide: Types,

Optical network terminals (ONTs) are essential endpoint devices in fiber-optic communication systems, responsible for converting optical signals from fiber

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

Anyone with fiber experimented with a GPON ONT SFP module?

Optimum''s fiber access uses the ITU-T G.984, "GPON" (Gigabit Passive Optical Network) standard. It''s basically a TDMA scheme for bidirectional fiber. It looks like CPE is a combination ONT (optical

What is ONT? The Engineer''s Guide to Optical Terminals

What is ONT and how does it work? Learn the engineering reality behind the Optical Network Terminal, ONT cables, photoelectric conversion, and LOS troubleshooting.

What Is an Optical Network Terminal?

Understanding the Role of the Optical Network Terminal The modern digital landscape relies on fast, reliable internet. Fiber optic technology is at the forefront of delivering this speed and

Optical Network Terminal (ONT) Units

Description An optical network terminal (ONT) unit is a device that connects fiber optics cables to other wiring such as Ethernet and phone lines by converting the signal from optical to electrical and vice

Optical Network Terminal (ONT) Equipment Market Size, Share

An optical network terminal (ONT) is a network interface device (NIDs) that used fiber to the premises applications. The ONT is used for terminating the fiber optic link, demultiplexing the

Optical Network Terminal (Ont) Equipment Market | Global Industry ...

The global optical network terminal (ont) equipment market, valued at approximately $14.26 billion in 2026, is forecasted to grow to $30.9 billion by 2035, at a CAGR of 9%.

What is ONT? Everything You Need to Know

ONT, short for Optical Network Terminal, is a vital component in fiber-optic communication systems. It acts as the endpoint device in a fiber-to-the-premises (FTTP) setup, translating optical

SFP GPON ONT (Optical Network Terminal)

An Optical Network Terminal (ONT), sometimes referred to as an Optical Network Unit (ONU), is a device that is placed at the customer''s premises and securely connects the incoming fibre supply to
