Malta-style cap-type fiber optic junction box

Overview

Amazon.com: Fiber Termination BoxFiber Optic Wall Mount Box with LC Couplers for Single Mode & Multimode Fiber Optic Cable. | Fiber Box Enclosure for MPOE'.

Key Takeaways

A Malta-style cap-type fiber optic junction box is a compact, wall-mounted enclosure designed to protect, organize, and terminate fiber optic cables, often featuring a removable cap for easy access and maintenance.Design and Structure

Malta-style cap-type junction boxes are typically small, durable enclosures made from materials like ABS or polyamide, designed for indoor or outdoor use. The "cap-type" refers to a removable or hinged cover that allows technicians to access the internal fiber splices, adapters, and pigtails without disassembling the entire box. This design helps maintain the bend radius of fibers, prevents dust ingress, and provides a secure environment for optical connections .

Functionality

These junction boxes serve multiple purposes in fiber optic networks:

• Splicing and Termination: They accommodate fusion or mechanical splices and house pre-terminated pigtails for SC, LC, or other connector types .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Distribution: They act as a distribution point for fiber connections in FTTH (Fiber to the Home) or FTTx networks, allowing multiple fibers to branch out to different endpoints .

• Protection: The enclosure protects fibers from environmental factors, mechanical stress, and accidental damage, often including dust covers or shutters for adapters .
Capacity and Compatibility

Malta-style cap-type boxes are available in various sizes, typically supporting 2 to 48 fibers, depending on the model. They can accommodate singlemode (OS1/OS2) and multimode (OM1, OM2, OM3, OM4) fibers, with adapters such as SC, LC, or MPO/MTP. Some models include splice trays or keystone modules for organized fiber management and color-coded identification .

Installation and Applications
• Wall-Mounted: Designed for mounting on walls in residential, commercial, or industrial settings.

• Indoor/Outdoor Use: Many enclosures are rated for outdoor conditions, with weatherproofing and UV-resistant materials.

• FTTH Networks: Commonly used as the termination point at subscriber premises or small distribution hubs.

• Compact Spaces: Ideal for locations where space is limited, providing a neat and organized solution for fiber management .
Advantages
• Easy access via removable cap for maintenance and upgrades.

• Supports multiple fiber types and connector standards.

• Protects fibers from environmental and mechanical damage.

• Compact and versatile for various network deployments. In summary, a Malta-style cap-type fiber optic junction box is a versatile, protective, and accessible solution for terminating, splicing, and distributing fiber optic cables in both indoor and outdoor networks, supporting a wide range of fiber types and connector configurations while maintaining organized and secure fiber management .
