ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Mongolian fiber optic connector manufacturers

Overview

About us Expanding its cable trade, Moncable brand products made in the factory of Corning fiber, one of the largest fiber optic cable factories Fiber Opti.

Key Takeaways

There are currently no fiber optic connector manufacturers based in Mongolia, but companies like New Optic LLC and Moncable Systems serve as key local suppliers and integrators for fiber optic infrastructure.

Local Companies and Their Roles

New Optic LLC is a Mongolian company that has been involved in major telecommunications projects, including the installation of over 1,500 km of fiber optic cable for high-speed DWDM and SDH networks. They act as a subcontractor for international firms like ZTE Corporation, providing technical supply, installation, and commissioning services for fiber optic networks, communication towers, and solar power projects .

Moncable Systems has been operating since 1996 and specializes in telecommunication infrastructure, including fiber optic cable installation, system integration, and distribution of high-quality international products. They supply fiber optic cables and modules from global manufacturers such as Corning and Zhaolong, and have completed over 20,000 km of telecom infrastructure across Mongolia .

International Suppliers in Mongolia

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

While Mongolia lacks domestic manufacturers, international companies provide fiber optic connectors and modules through local distributors. For example, SKY PFM Limited and other suppliers offer SFP optical transceivers, LC-type connectors, and fiber optic modules compatible with Mongolian networks . These products are often imported and installed by local integrators like New Optic LLC and Moncable Systems.

Summary
• No domestic fiber optic connector manufacturers exist in Mongolia .

• New Optic LLC and Moncable Systems are key local integrators and distributors, handling installation, supply, and commissioning of fiber optic networks .

• International suppliers provide connectors, transceivers, and modules, which are distributed and installed locally .

For sourcing fiber optic connectors in Mongolia, the most practical approach is to work with these local integrators who can provide both the products and technical expertise for deployment.
