ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Optical cable stripper for armored cables

Overview

Choose from our selection of armored cable strippers, including over 80 products in a wide range of styles and sizes.

Key Takeaways

Armored cable strippers are specialized tools designed to safely remove the outer sheath of fiber optic cables, including steel tape and non-metallic armoring, without damaging internal fibers.Key Features

Adjustable Blade Depth: Most armored cable strippers allow precise control of blade depth to match cable thickness, preventing damage to internal fibers. For example, the SI-01 stripper offers 0.25 mm incremental adjustments, while other models provide screw-based depth control for fine-tuning . Dual Cutting Modes: Many tools support both circumferential (around the cable) and longitudinal (lengthwise) cuts. This versatility allows technicians to remove jackets efficiently and prepare cables for splicing or termination . Cable Diameter Compatibility: Strippers handle a wide range of cable diameters. ScaleFibre's model supports 8–30 mm, SI-01 handles 10–25 mm, and other professional strippers cover 4–28.6 mm, accommodating most armored fiber optic cables . Material and Build Quality: High-quality strippers are made from aluminum alloy or aircraft-grade aluminum for durability and stability, with tool steel or tungsten carbide blades for cutting armored sheaths. Ergonomic handles and V-shaped guide wheels enhance control and reduce hand fatigue . Special Features: Some models include roller cable trackers or guide wheels to maintain cable stability during stripping, and replaceable blades for long-term use . Kits may also include spare blades for maintenance .

Recommended Use
• Non-metallic and steel tape armored cables: Suitable for outdoor plant installations and in-building setups.

• Fiber optic cables with multiple cores: Compatible with cables ranging from 2 to 288 cores .

• Professional applications: Ideal for electricians, network installers, and technicians requiring precise, repeatable stripping without damaging fibers.
Examples of Tools
• ScaleFibre Armoured Cable Stripper: Handles 8–30 mm cables, dual cutting modes, adjustable blade height, ergonomic alloy housing .

• SI-01 Fiber Optic Cable Stripper: Aluminum alloy construction, adjustable blade depth, compatible with 10–25 mm cables, includes spare blades .

• Professional Adjustable Strippers: Cover 4–28.6 mm, dual cutting methods, ergonomic design, and durable steel/aluminum construction . These tools ensure clean, efficient, and safe stripping of armored fiber optic cables, making them essential for professional fiber optic installation and maintenance.
