ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Price of Composite Optical Cable Equipment

Overview

We leverage a large inventory for fast shipping and specialize in custom fiber optic cable assemblies with rapid turnaround times.

Key Takeaways

Composite optical cable equipment costs range from $750,000 to $20 million depending on production scale, while per-meter composite optical cables typically range from a few dollars to tens of dollars.Manufacturing Equipment Costs

Setting up a composite optical cable production line involves significant capital investment. A standard fiber optic cable production line costs $750,000 to $2,500,000, with the main machinery accounting for 50–60% of the total cost. Key equipment includes fiber drawing towers, cabling machines, jacket extrusion lines, and secondary coating lines. Larger or fully automated lines, especially from European brands, can increase costs substantially. For a full-scale optical fiber manufacturing unit, machinery and equipment costs can range from $5 million to $20 million, depending on capacity and automation level . Installation, setup, and factory construction are additional expenses.

Per-Meter Composite Optical Cable Prices

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

For ready-to-use composite optical cables, prices are usually calculated per meter. For example, hybrid or composite fiber cables integrating voice, data, video, and power can vary based on fiber count, type (single-mode or multimode), and environmental ratings. Prices decrease with bulk purchases. Typical per-meter costs for industrial-grade composite optical cables range from $2 to $20 per meter, depending on specifications such as fiber count, shielding, and jacket material .

Factors Affecting Costs
• Equipment Brand and Origin: European brands are generally 50–100% more expensive than reputable Asian manufacturers .

• Automation Level: Fully automated lines reduce labor costs but require higher upfront investment .

• Cable Specifications: Fiber type, number of fibers, shielding, and environmental ratings affect per-meter cable prices .

• Installation and Setup: Transporting and commissioning equipment adds to total investment .
Summary
• Small-scale production line: $750,000 – $2,500,000

• Large-scale, fully automated unit: $5 million – $20 million

• Composite optical cable per meter: $2 – $20, depending on fiber count and specifications Investing in composite optical cable equipment requires careful planning, considering both machinery costs and operational expenses to achieve a competitive ROI within 18–36 months .
