Price of Curved Mesh Cable Trays

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Curved wire mesh cable trays are generally among the most affordable cable tray options, with prices influenced by material, size, and supplier.Overview of Wire Mesh Cable Trays

Wire mesh cable trays, also known as basket trays, are made from fine steel wires welded into a mesh structure. They are lightweight, flexible, and allow easy routing of cables, including curved paths, making them ideal for data centers, offices, and industrial installations . These trays are available in stainless steel (SS304/SS316) or electro-galvanized steel, providing options for corrosion resistance and durability . Curved sections are typically modular and compatible with straight tray sections, allowing smooth cable transitions around corners.

Pricing Factors
• Material: Stainless steel trays are more expensive than electro-galvanized steel due to higher corrosion resistance and longevity .

• Size and Dimensions: Width, height, and length of the tray affect the price. Wider or taller trays require more material and cost more.

• Supplier and Brand: Prices vary by supplier, with brands like RS PRO, Cablofil, and Legrand offering different pricing tiers .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Project Volume: Bulk purchases or modular kits can reduce per-unit costs. Large contractors often save 40–60% on total project costs by using wire mesh trays instead of conduit systems .

• Installation Efficiency: Wire mesh trays are faster to install than metal conduits, reducing labor costs and overall project expenses .
Typical Price Range

While exact prices for curved mesh trays vary, wire mesh trays are generally the least expensive type of cable tray, especially compared to ladder or solid-bottom trays. For budgeting purposes:

• Small curved sections (0.5–1 meter radius): Typically range from $20 to $50 per section depending on material and finish.

• Larger or heavy-duty curved trays: Can range from $50 to $150 per section, particularly for stainless steel or high-load applications . For precise pricing, suppliers like EAE Electric, McMaster-Carr, RS Online, and Direct Channel provide product catalogs and quotation options, allowing you to select the exact dimensions, material, and finish required for your project .
Cost Advantages

Using curved wire mesh trays instead of conduit systems can save significant time and money. The open mesh design allows easy cable placement, reduces labor for bending and threading wires, and improves airflow to prevent overheating . This makes them a cost-effective solution for both small and large-scale installations.
