ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Price of Eight-Core Composite Optical Cable

Overview

8 Core GYTC8S Figure-8 Fiber Optic Cable PriceThis kind of cable is specifically used for self supporting aerial Premium-Line Figure 8 Fiber Optic Cable, 9.

Key Takeaways

An eight-core fiber optic cable typically costs between $0.30 and $6 per foot, depending on fiber type, construction, and environmental rating.Pricing Overview

The cost of an 8-core fiber optic cable varies widely based on several factors:

• Fiber Type: Single-mode (OS2) cables are generally less expensive per foot than multimode (OM3/OM4) cables, with single-mode ranging from $0.09 to $1.52 per foot and multimode from $1.50 to $6 per foot depending on quality and manufacturer .

• Cable Construction: Armored cables for outdoor or harsh environments increase costs, typically $0.50 to $5 per foot, while indoor riser-rated or plenum-rated cables are cheaper .

• Jacket Material and Environmental Rating: Outdoor cables with UV-resistant or PE jackets cost more than indoor PVC or LSZH jackets .

• Pre-Terminated vs. Bulk Cable: Pre-terminated 8-core cables with connectors are more expensive due to factory termination, but reduce on-site labor costs .
Typical Use Cases

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

An 8-core cable is ideal for medium-scale network infrastructure, such as building backbones, interconnecting server rooms, or metropolitan area networks. Each fiber can support data rates from 1 Gbps to 100 Gbps, depending on transceiver technology .

Example Cost Estimates
• Indoor, single-mode, 1,000 ft run: Cable cost ≈ $0.40/ft, total ≈ $400, excluding labor and accessories .

• Outdoor, multimode, armored, 2,000 ft run: Cable cost ≈ $0.70/ft, total ≈ $1,400, with additional costs for installation, conduit, and connectors bringing the project to $4,940–$6,120 .

• Premium outdoor installation, 5,000 ft armored cable: Cable cost ≈ $1.00/ft, total ≈ $5,000, with full installation and testing reaching $11,000–$14,500 .
Key Considerations
• Bulk Purchases: Wholesale orders can reduce per-foot costs significantly.

• Future-Proofing: 8-core cables provide room for growth and redundancy without the complexity of higher-density cables .

• Installation Costs: Labor, trenching, splicing, and permits can often exceed the material cost of the cable itself . In summary, for an 8-core composite optical cable, expect $0.30–$6 per foot for the cable alone, with total project costs varying widely based on installation complexity, cable type, and environmental requirements .
