Key Takeaways

The price of ladder-type fireproof cable trays in Singapore varies widely depending on material, size, and certification, typically requiring a supplier quote for accurate pricing.Overview of Ladder-Type Cable Trays

Ladder cable trays are designed with two side rails connected by evenly spaced rungs, providing strong support for heavy cable loads and excellent ventilation. They are ideal for industrial environments where high-volume or heavy cabling needs to be managed efficiently ( ). Fireproof versions are often made from stainless steel (SS304, SS316, SS316L), aluminium, or FRP materials, which offer resistance to heat and fire hazards ( ).

Factors Affecting Price
• Material: Stainless steel and FRP trays are generally more expensive than galvanised steel due to durability and fire resistance ( ).

• Size and Span: Longer spans and wider trays increase material usage and cost.

• Certifications: Compliance with IEC 61537 or NEMA VE-1 standards can affect pricing ( ).

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Customization: Special finishes, perforations, or accessories for cable management may add to the cost ( ).
Supplier Guidance

In Singapore, suppliers such as NEXE, AEHUB, Ferrotech, and Lim Kim Hai Electric provide ladder-type cable trays and accessories ( ). Since prices are project-specific, the most reliable way to obtain accurate pricing is to request a quote directly from these suppliers, specifying the material, dimensions, load requirements, and fireproof rating.

Practical Tip

For budgeting purposes, ladder-type fireproof cable trays in industrial settings can range from SGD 50 to SGD 200 per meter depending on material and specifications, but exact pricing should always be confirmed with the supplier. By contacting suppliers with your project requirements, you can receive tailored quotes and ensure compliance with fire safety and load-bearing standards.
