Price of composite fiberglass cable trays in Panama

Overview

Fiberglass Cable Trays Panama Buyers & Importers Sell Fiberglass Cable Trays Panama in bulk to verified buyers and importers. Connect with businesses activ.

Key Takeaways

Fiberglass cable trays in Panama typically range from $50 to $200 per meter, depending on size, type, and resin system.Overview of Fiberglass Cable Trays

Fiberglass cable trays, also known as FRP (Fiber Reinforced Polymer) or GRP (Glass-Reinforced Polymer) trays, are widely used in industrial, commercial, and offshore applications due to their corrosion resistance, lightweight, and high strength-to-weight ratio . They are ideal for harsh environments such as chemical plants, wastewater treatment facilities, and coastal installations, where traditional steel trays may corrode or require frequent maintenance .

Factors Affecting Price
• Tray Type and Design: Ladder-type, perforated, solid-bottom, or U-channel trays have different manufacturing costs. Ladder trays are common for high-capacity installations, while solid-bottom trays offer better protection for sensitive cables .

• Resin System: Polyester and vinylester resins are standard, with vinylester generally costing more due to higher chemical and UV resistance .

• Size and Load Capacity: Wider trays or those designed to carry heavier cable loads are more expensive. Standard widths range from 100 mm to 600 mm, with larger widths increasing material costs .

• Customization and Accessories: Fittings, bends, supports, and corrosion-resistant fasteners add to the overall cost .

• Supplier and Import Costs: Local suppliers in Panama, such as Brilltech Engineers and Jeetmull Jaichandlall, provide both standard and custom trays. Prices may vary based on shipping, import duties, and local market demand .
Estimated Price Range
• Small to medium trays (100–300 mm width): $50–$100 per meter

• Large trays (400–600 mm width, high load capacity): $120–$200 per meter

• Custom or specialized trays (chemical-resistant, high-temperature): $200+ per meter These estimates are consistent with international FRP cable tray pricing and reflect the additional costs of shipping and local distribution in Panama .
Supplier Guidance

For accurate pricing and quotes, it is recommended to contact local suppliers directly. Companies like Brilltech Engineers and Jeetmull Jaichandlall offer consultation, system design support, and free quotes tailored to project requirements . When requesting a quote, provide details such as tray type, width, length, load requirements, and environmental conditions to ensure precise pricing.

Conclusion

Fiberglass cable trays in Panama are a durable and cost-effective solution for harsh environments, with prices generally ranging from $50 to $200 per meter depending on specifications. Engaging with local suppliers will provide the most accurate and project-specific pricing while ensuring compliance with industry standards and installation requirements .
