ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Price of fiber optic cable splicing heads

Overview

Fiber Optic Splicing Equipment Fiber Instrument Sales has a wide variety of fiber optic splicing equipment such as fusion splicers from AFL, Sumitomo, FITE.

Key Takeaways

Fiber optic fusion splicers typically cost between $3,000 and $15,000, while mechanical splice kits range from $100 to $500.Fusion Splicers

Fusion splicers are the primary tool for permanent fiber optic splicing, using an electric arc to join fibers with minimal signal loss. Prices vary based on features such as automatic alignment, ribbon splicing capability, and real-time splice loss estimation. Entry-level models start around $3,000, while high-end professional units can exceed $15,000 . Ribbon fusion splicers, designed for splicing multiple fibers simultaneously, are generally at the higher end of this range due to their efficiency in high-fiber-count networks .

Mechanical Splice Kits

Mechanical splicing is a simpler method that aligns fibers using a fixture without heat. Kits for mechanical splicing are significantly cheaper, typically costing $100 to $500, but they may result in slightly higher signal loss and are often used for temporary or emergency repairs .

Additional Equipment Costs

• Fiber Cleaver: Essential for preparing fiber ends before splicing, costing $500 to $2,000 depending on precision and brand .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Accessories: Splice trays, closures, and protective sleeves may add to the overall project cost but are not included in the splicer price.
Considerations
• Project Size: Large-scale projects may benefit from volume pricing or multi-fiber splicers, reducing per-splice costs .

• Portability: Field splicers with battery operation and LCD screens are available for mobile installations, often influencing price .

• Vendor Options: Online marketplaces like Amazon and specialized suppliers such as SplicerMarket.com offer a range of models and prices, allowing comparison before purchase . In summary, for a reliable fiber optic splicing setup, expect to invest $3,000–$15,000 for a fusion splicer and $100–$500 for mechanical splice kits, with additional costs for cleavers and accessories depending on project requirements.
