ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Red light pen can penetrate fiber optic cable

Overview

The B5 Visual Fault Locator (VFL) is a high-quality, portable tool designed for testing fiber optic cables.

Key Takeaways

A Visual Fault Locator (VFL) with a 650nm red laser can pass light through fiber optic cables to detect faults, trace fibers, and verify continuity.Overview

A Visual Fault Locator (VFL), often pen-shaped, emits a visible red laser (typically 650nm) that travels through fiber optic cables. When the fiber is intact, the light passes through; if there are breaks, bends, or poor connections, the red light leaks out at the fault point, allowing technicians to visually locate issues . VFLs are widely used in telecommunications, CATV, and fiber installation projects .

Key Features
• Wavelength: 650nm red light, visible to the human eye .

• Power Output: Commonly 1–10mW for short-range testing, with higher-power models reaching up to 60mW for longer distances .

• Distance: Effective tracing range varies from 1km to 10km or more depending on fiber type and VFL power .

• Connector Compatibility: Standard 2.5mm ferrules for SC, ST, and FC connectors; adapters available for 1.25mm LC connectors .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Modes: Continuous (CW) and flashing (Glint) modes for easier fault detection .

• Portability: Lightweight, battery-operated, and easy to carry for field use .
Usage
• Connect the VFL to the fiber optic cable using the appropriate ferrule or adapter.

• Turn on the red laser; the light will travel through the fiber.

• Inspect the fiber along its length or at the far end. Any visible red light leakage indicates a break, bend, or poor connection.

• Trace fibers in bundles or verify continuity between endpoints.
Recommended Models
• RPEN-210 VFL Pen: 10mW, 650nm, up to 10km tracing, compatible with SC/ST/FC connectors .

• Karono 10mW VFL: Suitable for single-mode and multi-mode fibers, used for fiber tracing and continuity checking .

• FiberLife 1–60km VFL: Offers higher power options (1–60mW) for longer fiber runs .
These tools are essential for fiber optic installation, maintenance, and troubleshooting, providing a cost-effective and efficient way to locate faults and verify fiber continuity.

Article Content

Do you know how to use a fiber optic red light pen?

As can be seen from the above introduction, the fiber optic red light pen is simple to use. It

FC-2005 Fiber Checker Pro

It sends a visible 650nm wavelength red laser light through a fiber optic cable to identify fiber cable faults (breaks, bending or

Fiber Optic Red Light Pen Tester VFL (Visual Fault Locator)

This pen shaped visual fault locator is a tool used on terminated fiber optic cables to locate sharp bends or breaks in jacketed or bare

Visual Fault Locator Fiber Optic Cable Tester VFL 10KM

About this item □10KM VISUAL FAULT LOCATOR□ Emits a powerful 650nm visible red light with 10KM output to penetrate up to

B5 Visual Fault Locator Instruction Manual

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

The B5 Visual Fault Locator (VFL) is a high-quality, portable tool designed for testing fiber optic cables. It emits a powerful red laser

Visual Fault Locator, Red Light Pen Fiber Optic Cable

The 2.5mm universal connector of the detector is compatibly designed for ST, SC, FC interferes both in

VFL Visual Fault Locator Pen KI6358 | Kingfisher International

A fiber visual fault locator pen VFL for fiber optic installation, fault finding, continuity checking, polarity checking, verifying a signal

How to Use a Visual Fault Locator (VFL): A Step-by-Step Guide

A VFL is used to detect faults, breaks, or bends in fiber optic cables by emitting a bright red light that is visible even

Visual Fault Locator, Fiber Optic Cable Tester Pen, VFL Red Light

This robust visual fault locator features a high-efficiency 650nm red light source that easily travels through optical fibers up to 30km.

Visual Fault Locator Pen VFL 650nm Red Light Tester Fiber Optic

FAQs What is the HY-55 used for? Quickly detecting breaks, bends and faults in fiber optic cables with a visible 650nm red light.

Fiber Optic Red Light Pen Tester VFL (Visual Fault

Overview This pen shaped visual fault locator is a tool used on terminated fiber optic cables to locate sharp

Visual Fiber Optic Fault Locator (Pen Style)

The Visual Fiber Optic Fault Locator (Fiber Checker) in Pen Style is a particularly useful tool designed for

Amazon : Fiber Optic Laser Tester

Fiber Optic Visual Fault Locator Kit, VFL Pen for Fiber Cable Test, Red Light Finder for Single Mode and Multimode Cable,

Ultra Spec Visual Fault Locator (VFL) 1mW 5km, Fiber Optic Network ...

Ultra Spec Visual Fault Locator (VFL) 1mW 5km, Fiber Optic Network Cable Tester Detector Meter Red Light Pen for FC, SC, ST,

VFL-22M red light source, red light pen, lighting pen, clear light pen ...
