ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Safety net for distribution boxes

Overview

Warehouse safety netting is a warehouse tool that increases worker safety and reduces inventory damage by preventing items from falling from your rack or from tall, stacked inventory. It is made from heavy-duty nylon or polypropylene and is available in several load capacity ratings. Also known as protective guard netting, rack netting, and overhead netting, safety netting benefits warehousing and distribution operations in at least nine different ways. First, a brief explanation of safety netting. Our plastic fence netting can be used for many outdoor applications, like marking off-road construction, while our steel netting is tough enough to handle any. Warehouse safety netting is a type of protective barrier used in warehouses or other industrial settings to prevent accidents and injuries caused by falling objects. Choose from: Poly/Nylon Safety Netting – easy to install and durable polypropylene or nylon netting.
