Singapore Network Cabinet Size Specifications

Overview

Nexpand - 24U 800x1000x1300mm 19inches cabling cabinet - 1500kg load capacity - IP20 protection - Supplied with side panels ...

Key Takeaways

Network cabinets in Singapore typically follow 19-inch rack standards with varying heights, widths, and depths to accommodate IT and telecom equipment.Standard Dimensions and Compliance

Most network cabinets in Singapore are designed to comply with international standards such as ANSI/EIA RS-310-D, IEC297-2, DIN 41491, DIN 41494, GB/T 3047.2-92, and ETSI . The standard width for rack-mounted equipment is 19 inches, while heights are measured in rack units (U), with common sizes ranging from 6U to 42U. Depths typically range from 600mm to 1200mm, and widths are usually 600mm or 800mm, depending on the model and intended use .

Types of Cabinets
• Free-standing cabinets: Suitable for housing multiple servers and networking devices, offering high weight capacity and better airflow management .

• Wall-mounted cabinets: Ideal for smaller setups or edge computing environments, providing compact installation while supporting standard 19-inch racks .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Open-frame racks: Provide unobstructed airflow and easy access to equipment, often used in environments where security is less critical, such as the VBOZ N Series VN6X1509, which has W600 x D900mm dimensions and supports multiple rack-mount servers and networking devices .

• Enclosed cabinets: Include doors and side panels for security and controlled airflow, suitable for data centers and industrial IT setups .
Key Considerations
• Usable vs. overall dimensions: Ensure the cabinet fits the operating environment and allows for proper cable management and airflow .

• Weight capacity: Check the maximum load to support servers, UPS units, and networking equipment .

• Airflow and cooling: Open-frame or perforated panels improve ventilation, preventing overheating .

• Installation flexibility: Modular systems like Panel SeT enclosures allow quick assembly and adaptability for edge computing or industrial IT applications .

• Future expansion: Some cabinets include extra shelves or adjustable mounting rails to accommodate additional equipment .
Example Models
• VBOZ N Series VN6X1509: Open-frame, 15U, W600 x D900mm, optimized for airflow and easy access .

• Schneider Electric Panel SeT: Steel-made enclosures for 19-inch racks, suitable for servers, switches, UPSs, and telecom gear, designed for durability and industrial IT environments . These specifications ensure that network cabinets in Singapore can accommodate a wide range of IT and telecom equipment while providing flexibility, security, and efficient cooling.
