ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Specifications and Models of Wired Fiber Optic Cable Junction Box

Overview

MR398-JB Fiber Optic Junction Boxes MR398-JB series fiber optic junction boxes are designed to join two fiber optic cables and environmentally Fiber optic.

Key Takeaways

Fiber optic junction boxes are protective enclosures designed to organize, connect, and protect fiber optic cables, available in various models for indoor, outdoor, wall-mounted, and rack-mounted applications.Overview

A fiber optic junction box (also called a distribution or termination box) serves as a central point for connecting and managing fiber optic cables. It ensures efficient connectivity, protection against environmental factors, and organized cable management. These boxes are widely used in telecommunication networks, data centers, residential FTTH installations, and industrial environments .

Types and Models
• Wall-Mounted Junction Boxes
• Ideal for indoor applications.

• Accommodate adapters such as SC, LC, or ST.

• Example: LCFTB-104A-SCA with 4 SC/APC coupler ports and pre-installed pigtails .

• Material: ABS or ABS+PC for durability .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Rack-Mounted Junction Boxes
• Designed for 19" racks in data centers.

• Provide fiber splicing, distribution, and tray storage.

• Example: GZR Series 19" Rack-mounted Terminal Box supports up to 48 channels (96 fibers), .

• Outdoor Junction Boxes
• Weatherproof and suitable for aerial or underground installations.

• IP-rated for environmental protection (e.g., IP65 for MR398-JB series), .

• Can accommodate Duplex LC, ST, and industrial ODVA IP-LC connectors .

• Dome Closure Boxes
• Dome-shaped for aerial and underground fiber protection.

• Maintain bend radius for fibers and prevent moisture ingress .

Key Specifications
• Ingress Protection (IP) Rating: Commonly IP65 for outdoor models, ensuring dust and water resistance .

• Connector Compatibility: Supports SC, LC, ST, and industrial-grade connectors .

• Cable Capacity: Varies by model; small indoor boxes may support 2–8 fibers, while rack-mounted or high-count outdoor boxes can handle 48–96 fibers .

• Material: High-impact ABS+PC or similar durable plastics for mechanical protection .

• Mounting Options: Wall-mounted, pole-mounted, or rack-mounted depending on deployment environment .

• Internal Components: Splice trays, couplings, pigtails, and cable glands to organize and protect fiber splices .
Applications
• Telecommunication Networks: Centralized fiber management and distribution.

• FTTH Deployments: Termination and distribution at subscriber premises.

• Data Centers: High-density fiber management with minimal signal loss.

• Industrial Facilities: Reliable communication networks in harsh environments .
Example Models
• MR398-JB Series: IP65, supports Duplex LC, ST, and ODVA IP-LC connectors, suitable for outdoor use .

• F2H-FPX-P15 Series ODF: Terminal equipment for fiber wiring, fixation, fusion, and patching .

• LCFTB-108A-SC: Indoor wall-mounted box with 8 SC/UPC coupler ports and pre-installed pigtails . These models provide flexibility for different deployment scenarios, from small residential installations to large-scale industrial or data center networks. Proper selection depends on fiber count, connector type, environmental conditions, and mounting requirements.
