Splitter issue causing upload speed of 0

Overview

Get in touch with your Internet Service Provider 2. When the signal is divided, the available bandwidth is also divided among the split signals. This means that each device connected through a splitter will receive a reduced amount of bandwidth, resulting in slower internet. I have 500/50 internet speed via cable, I installed a splitter this one to be exact and my speeds are still the same, latency is roughly the same, loaded latency has always shown near 200 to me for some reason, if I turn on QoS in my router it improves but it also caps me at 350/30 and no, not. upload speeds drop to 0 but downloads are fine?

so very frequently when im using the internet at my home the internet renders itself disconnected but upon further experimentation ive noticed my download speed stays constant and downloading/receiving data is completely stable and works just. An Ethernet splitter can drop your network speed from gigabit (1000 Mbps) down to just 100 Mbps. Splitters are cheap and simple to. Many users rely on an Ethernet splitter to optimize their home or office network, but when faced with the issue of an Ethernet splitter not working, their network setup may suddenly become inconvenient.

Can a Splitter Cause Internet Issues? Understanding the Impact of ...

This is because a splitter divides the signal strength between multiple devices, potentially reducing the speed and quality of your internet connection. However, the impact is usually minimal

Cable splitter worsening internet speed? : r/HomeNetworking

Splitter simply provides a half signal strength to each ''Out'' port. Since an incoming signal is so powerful, then even four ''Out'' ports (only one-quarter signal strength) would be more than sufficient.

Download rate to some extent is affected by upload rates but it is pretty much only sending back acknowledgements which are tiny packets. If you have a cable modem there should be

networking

Look at the signal levels for all the downstream channels and make sure they''re all within the 0 dBmV ±7 range, hopefully centered around 0 dBmV. If adding that splitter did knock some of

Does Using a Splitter Slow Down Internet? Uncovering the Truth

However, the use of a splitter can potentially impact internet speed, as the signal is being split and distributed among multiple devices. This can lead to a reduction in signal strength and

Do Ethernet Splitters Reduce Speed?

The short answer is – yes, ethernet splitters can potentially reduce your network connection speeds. By understanding how they work technically, you can better decide where to use splitters versus other

Will a Splitter Slow Down Your Internet? Unveiling the Truth

If one device experiences slow speeds while others perform well, it could suggest that the splitter is causing an imbalance in bandwidth allocation. Making informed evaluations through these

Cable splitter worsening internet speed? : r/HomeNetworking

Howdy folks, having a weird issue. I have 500/50 internet speed via cable, I installed a splitter this one to be exact and my speeds are still the same, latency is roughly the same, loaded latency has always

How does a splitter cause file upload issues? : r/techsupport

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

I was getting failures when trying to upload files to any website (I tried multiple) on my wifi but it was otherwise working fine and giving good speeds for both download and upload. So the Comcast tech

Extremely Low Upload Speed w/Ethernet Connected

I have been struggling with my ethernet connection for my PC lately. I have extremely fast internet speed and for some reason my upload speed is very slow when ethernet is plugged in

Proven Solutions for Fixing Slow Xfinity Upload Speed

Cable splitters are a common cause of issues with internet connection and speed. Try removing cable splitters and testing your connection, or purchase

The Speed Bump of Internet Connectivity: Do Splitters Reduce

In conclusion, splitters can reduce internet speed, but the extent of the speed reduction depends on several factors, including the quality of the splitter, the type of internet connection, and

Upload speed consistently below 1 Mbps. What can I do? | Xfinity ...

I replaced the splitter that Xfinity provided, made by Commscope, with an Arris amplifier/splitter and this resolved the issue. We''re now getting about 15 Mbps upload speeds, up
