ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Standard dimensions of external wiring ducts for electrical distribution boxes

Overview

It includes 10 diagrams showing configurations for single electrical ducts, multiple ducts, and buried cable installations.

Key Takeaways

External wiring ducts typically range from 15 mm to 150 mm in width and 17 mm to 100 mm in height, with slot sizes varying between 4–12 mm depending on the duct type and manufacturer.Typical Widths and Heights

Wiring ducts are available in a variety of standard widths and heights to accommodate different cable bundles and panel sizes. Common dimensions include:

• Widths: 15 mm, 25 mm, 40 mm, 60 mm, 80 mm, 100 mm, 150 mm

• Heights: 17 mm, 25 mm, 40 mm, 60 mm, 80 mm, 100 mm These dimensions allow for flexible installation in control panels, distribution boxes, and electronic enclosures. Slot Sizes

Slots in wiring ducts facilitate cable entry and organization. Standard slot sizes are:

• 4–6 mm slots for smaller ducts

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• 8–12 mm slots for larger ducts The slot spacing and size are designed to maintain cable separation, airflow, and safety compliance.
Material and Standards
• Material: Most wiring ducts are made from PVC or thermoplastic materials, offering flame resistance (UL 94 V-0) and durability .

• Standards Compliance: Many ducts conform to DIN EN 50085 for cable protection and mounting, ensuring compatibility with DIN rails and panel enclosures .
Selection Guidelines
• Measure the total cable bundle size and select a duct that allows 50–90% fill to maintain airflow and prevent overheating .

• Consider future expansion and ventilation requirements when choosing duct height and width.

• For outdoor or high-safety applications, select ducts with fire-resistant or reinforced designs.
Summary

Standard external wiring ducts for electrical distribution boxes are designed to provide organized cable routing while meeting safety and regulatory standards. Widths range from 15–150 mm, heights from 17–100 mm, and slot sizes from 4–12 mm, with material and design choices guided by application requirements and compliance standards .
