ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Standard network cabinet cable management rack price

Overview

Discover cable management racks designed for desks and server installations. Keep cables organized and out of sight.

Key Takeaways

Standard network cabinet cable management racks typically range from $20 to $150 depending on type, size, and features.Price Overview
• Cable Management Trays: Basic 1U or 2U cable trays for standard 19" racks are generally priced between $20 and $50. These trays are often made of ABS or metal, feature multiple ports for cable routing, and are suitable for small to medium-sized network setups (COBTEL LXJ series) .

• D-Ring Panels and Vertical Managers: Metal D-ring panels or vertical cable managers designed for 19" racks usually cost $30 to $80. They help organize cables, maintain airflow, and are compatible with standard rack heights like 1U or 2U .

• Full Rack Cable Management Solutions: Enclosed racks with integrated cable management, including vertical and horizontal channels, can range from $100 to $150 or more, depending on height (12U–48U), depth, and material quality. These are ideal for data centers or larger IT installations .
Factors Affecting Price
• Rack Size and Height: Taller racks (e.g., 42U–48U) require longer vertical cable managers, increasing cost.

• Material: ABS plastic is cheaper, while steel or aluminum panels offer higher durability and load capacity.

• Port Capacity: More ports or channels for cable routing increase the price.

• Brand and Vendor: Established brands like APC, Rittal, or Monoprice may charge a premium for quality and warranty.

• Additional Features: Lockable panels, airflow optimization, and modular designs can add to the cost.
Buying Tips
• For small office setups, a simple 1U or 2U tray or D-ring panel is sufficient.

• For data centers, consider racks with integrated vertical and horizontal cable management to reduce installation time and improve maintenance efficiency.

• Always check compatibility with your rack width (19" standard) and depth (600mm–1200mm) before purchasing. By considering these factors, you can select a cable management solution that balances cost, functionality, and scalability for your network infrastructure.
