ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Supply of stepped cable trays

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Stepped cable trays are widely available in steel, aluminum, and fiberglass, with a growing global market driven by industrial, construction, and telecommunications demand.Market Overview

The stepped cable tray market is experiencing rapid growth due to increasing infrastructure development, industrial automation, and the need for organized cable management systems in commercial and industrial facilities . The market size was estimated at USD 1.2 billion in 2024 and is projected to reach USD 2.5 billion by 2033, growing at a CAGR of 9.1% from 2026 to 2033 . Globally, the market is moderately fragmented, with multiple regional and international suppliers offering diverse product variants and customization options .

Material Types and Applications
• Steel-based trays dominate the market (around 55%), offering high strength and durability, ideal for oil and gas, industrial manufacturing, and power distribution .

• Aluminum trays account for approximately 30% of the market, valued for their lightweight nature and corrosion resistance, suitable for telecommunications and infrastructure projects .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Fiberglass and coated steel are emerging as alternatives for environments requiring chemical resistance or reduced weight . Stepped cable trays are designed with tiered profiles to allow efficient segregation of cables, prevent overlap, and enhance airflow, which reduces overheating risks in electrical systems .
Regional Supply

The Asia-Pacific region holds a significant share of the market (around 40%), driven by rapid industrialization in countries like China and India . North America and Europe also maintain strong demand due to urbanization, smart building projects, and modernization of electrical infrastructure .

Suppliers and Standards

Suppliers such as SFSP provide a wide range of steel and aluminum cable trays compliant with international standards including BS EN 61537:2023, NEMA, CENELEC EN 50173-1, and ISO/IEC 11801-1:2017 . Products are available in various thicknesses (1.0 mm to 2.0 mm) and finishes (pre-galvanized, hot-dip galvanized, stainless steel, aluminum), ensuring compatibility with different installation requirements .

Trends and Considerations
• Modular and configurable tray systems are increasingly preferred for complex architectural layouts .

• Integration with smart building and automation systems is gaining traction, allowing real-time monitoring and maintenance .

• Eco-friendly and sustainable manufacturing practices are becoming more common among suppliers . Overall, the supply of stepped cable trays is robust, with multiple material options, global availability, and adherence to international standards, making them suitable for a wide range of industrial, commercial, and infrastructure applications.
