ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Swiss optical cable splice box manufacturer

Overview

Contrik AG is a prominent Swiss manufacturer that specializes in high-quality fiber optic cables, among other products.

Key Takeaways

Leading Swiss manufacturers of optical cable splice boxes include Fiberswiss AG, R&M, and DIAMOND SA, offering high-quality, modular, and professional fiber optic solutions.Fiberswiss AG

Fiberswiss AG, based in Sitterdorf, Switzerland, specializes in comprehensive fiber optic technology solutions, including cable end closures and splice boxes for both indoor and outdoor applications . Their products are designed to support professional installations with a focus on Swiss precision and reliability.

R&M (Reichle & De-Massari)

R&M, a Swiss developer, produces the SYNO family of fiber optic splice closures, suitable for underground and aerial cabling . Their splice boxes are resealable, allowing retrofitting, densification, or reconfiguration on-site. The S-400 and S-500 models support high-density configurations, with the S-500/HD accommodating up to 3,456 ribbon fiber splices. These closures comply with Telcordia GR-771® standards and are designed for flexible, future-proof network expansion.

DIAMOND SA

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

DIAMOND SA offers high-performance fiber optic solutions, including precision-engineered splice boxes and connectors . Their vertically integrated production ensures ultra-clean, high-precision components, suitable for industrial, aerospace, and telecom applications. DIAMOND emphasizes modularity, reliability, and compliance with international standards, making their products ideal for demanding fiber optic networks.

Key Considerations

When selecting a Swiss splice box manufacturer, consider:

• Modularity and future-proofing: Modular systems like SlimConnect and VarioConnect allow easier network expansion .

• Port density: High-density options support up to 96 fibers per 1U or more, depending on the model .

• Standards compliance: Look for certifications such as Telcordia GR-771® and IEC 61754 .

• Installation flexibility: Resealable closures and pre-terminated systems reduce installation time and allow on-site adjustments .

• Local support and lead times: Swiss manufacturers provide short transport distances, direct technical support, and customization options . These Swiss manufacturers combine precision engineering, modular design, and compliance with stringent quality standards, making them suitable for professional fiber optic networks in municipal, industrial, and telecom environments.
