The fiber optic light on the telecom router is always on

Overview

This light indicates the connection between your ONT and your router or computer. Flashing Green/Blue: Data is being transmitted. If OFF: The router is not powered — check the socket, adapter, or power cable. PON (Passive Optical Network) Normal: Solid. The Optical Network Terminal (ONT) is a crucial device in modern telecommunications, serving as the interface between your home network and the fiber-optic internet connection provided by your Internet Service Provider (ISP). All networking devices, like modems and routers, provide a row of status lights that represent the. The signal shows a full signal, but the network speed is still slow?

What does it mean when the ONU indicator keeps flashing?

Plug in and light up, showing whether ONU is connected to power, ONU without power connection is useless. These lights act as a quick diagnostic language shared by routers, modems, and gateways, helping both users and technicians instantly.
