What do SU68AD represent on the optical module

Overview

SU68AD We test every SU68AD optical transceiver before shipment to make sure the SU68AD can work in your system without any problem. SU68AD Add to Compare.

Key Takeaways

SU68AD is a Marconi-compatible SFP optical transceiver module supporting 100 Mbps to 2.7 Gbps data rates, CWDM, 50 km transmission distance, and DDM functionality.

The SU68AD is a Small Form-factor Pluggable (SFP) transceiver designed for high-performance optical networking applications. It supports data rates ranging from 100 Mbps up to 2.7 Gbps, making it suitable for a variety of network speeds and protocols . The module is compatible with Marconi series equipment and adheres to the Multi-Source Agreement (MSA), ensuring interoperability with other MSA-compliant devices . Key Features:

• CWDM Support: The SU68AD operates using Coarse Wavelength Division Multiplexing (CWDM), allowing multiple optical signals to be transmitted over a single fiber, which increases network capacity .

• Transmission Distance: It can transmit data up to 50 km, making it suitable for long-distance connections in metropolitan or enterprise networks .

• DDM Functionality: The module includes Digital Diagnostic Monitoring (DDM), which provides real-time monitoring of parameters such as optical output power, input power, temperature, and voltage, helping maintain network reliability .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Laser Class: It is a Class 1 laser product, ensuring safe operation under standard conditions .

• Compatibility: Fully compatible with all Marconi SFP-supporting devices, providing a cost-effective alternative to higher-priced transceivers . The SU68AD is widely used in telecommunications, data centers, and enterprise networks where reliable, long-distance optical connections are required. Its combination of high data rate, CWDM capability, and DDM monitoring makes it a versatile and dependable choice for optical networking deployments .
