What does lc-lc mean in fiber optic patch cord

Overview

For example, there are LC to LC fiber optic patch cords, SC to SC fiber optic patch cords, and LC to FC cables.

Key Takeaways

An LC-LC fiber optic patch cord is a cable terminated with LC (Lucent Connector) connectors on both ends, designed for high-density, low-loss optical connections.What LC-LC Means

The term LC-LC indicates that the fiber optic patch cord has LC connectors on both ends. LC connectors are small form-factor connectors with a 1.25 mm ferrule, which is half the size of SC connectors, allowing for high-density port arrangements in data centers and telecom networks . The connectors use a push-pull latch mechanism, similar to an RJ45, for secure and easy connections .

Key Features
• Compact Size: Ideal for high-density applications, conserving space in patch panels and network racks .

• Low Insertion Loss: Typically around 0.1–0.3 dB per connection, ensuring minimal signal degradation .

• Duplex or Simplex Options: Duplex LC-LC cables carry two fibers for bidirectional communication, while simplex carries a single fiber .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Single-mode and Multimode: Single-mode (9/125 µm) is used for long-distance transmission, while multimode (50/125 or 62.5/125 µm) is suitable for shorter distances .

• High Reliability: LC connectors are standardized under IEC 61754-20, ensuring compatibility across devices like SFP, XFP, and SFP+ transceivers .
Applications

LC-LC patch cords are widely used in:

• Data centers for high-speed Ethernet and fiber channel connections

• Telecommunication networks for signal routing

• LANs and campus networks for device interconnections

• FTTH (Fiber to the Home) and other high-density optical deployments
Advantages
• Space Efficiency: Small connector size allows more ports per panel.

• Ease of Use: Push-pull latch simplifies installation and maintenance.

• High Performance: Low insertion loss and high return loss support high-speed data transmission.

• Versatility: Available in various lengths, single-mode or multimode, and duplex or simplex configurations . In summary, an LC-LC fiber optic patch cord is a versatile, high-performance cable with LC connectors on both ends, optimized for dense networking environments and reliable optical signal transmission.
