ZITHA TECH SPECIALTY CABLES (Pty) Ltd

What is the width of cable trays in Jamaica

Overview

Conclusion: This 25mm x 25mm Raceway Trunking in white by Carisol is a must-have for efficient cable management.

Key Takeaways

Cable trays in Jamaica are commonly available in widths ranging from 2 inches to 24 inches.

Cable trays in Jamaica are manufactured to accommodate various electrical installation needs, with nominal widths typically ranging from 2 in. to 24 in. for straight sections, allowing for flexible cable management and proper airflow for heat dissipation . These widths are standard across different tray types, including ladder, perforated, solid-bottom, and wire mesh trays, and are designed to meet industry standards for safety and structural support .

Common Widths and Considerations
• Small widths (2–6 inches): Suitable for control circuits, small signal cables, or low-capacity installations.

• Medium widths (8–16 inches): Ideal for moderate cable loads in commercial or industrial settings.

• Large widths (18–24 inches): Used for high-capacity power distribution, data centers, or solar DC trunk runs .
Material and Installation

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

Cable trays in Jamaica are made from galvanized steel, stainless steel, or fiberglass, ensuring durability and compliance with local electrical codes . The width selection should consider cable fill, heat dissipation, and future expansion, as wider trays allow easier cable routing and reduce overcrowding .

Summary

When selecting cable trays in Jamaica, the width range of 2 in. to 24 in. provides flexibility for small to large-scale installations. It is important to match the tray width with the type of cables, load requirements, and installation environment to ensure safety, efficiency, and compliance with standards .
