ZITHA TECH SPECIALTY CABLES (Pty) Ltd

What kind of door should be used for the outdoor machine room

Overview

A steel industrial door is the preferred choice for facilities requiring maximum durability, security, and fire resistance. These doors are engineered from heavy-gauge steel, often reinforced with internal cores such as honeycomb, polystyrene, polyurethane, or steel-stiffened structures. The choice. Maxium Doors design and manufacture high-quality plant room doors tailored for both new installations and replacements. Standard doors for machine and other heavy-duty uses are much like your everyday hinged door, but on industrial-grade steroids. It's common to pair them as double doors (often. In order to choose the right industrial door, you must first know whether it will be used indoor or at the exterior, then you will need to know the working environment it will be placed in and to characterize the degree of security required.
