1. Legrand – Cablofil Wire Mesh Trays Legrand's Cablofil line is recognized as a global standard for cable management, offering wire mesh trays, ladder trays, and prefab assemblies. Their wire mesh trays are designed for fast installation, excellent ventilation, and safe cable routing in industrial, commercial, and data center environments. Cablofil products are available in stock and ready to ship, with options for food and beverage facilities and large-scale projects. Accessories like dropouts, bends, and connectors are also available to customize installations . 2. Grainger Industrial Supply Grainger offers wire mesh cable trays, also known as basket trays, suitable for routing small-diameter cables such as data communication lines. These trays allow airflow to prevent overheating and are smooth to avoid cable abrasion. They can be mounted on walls, ceilings, or under floors and are compatible with fittings and accessories for curves, slopes, and tees, making them ideal for complex cable runs . 3. Interflex USA – VIAFIL Wire Mesh Cable Trays Interflex USA provides VIAFIL electro-welded steel and stainless steel wire mesh trays, combining strength and flexibility. They offer multiple finishes, including hot-dip galvanized, acid-passivated stainless steel, and high-resistance coatings for indoor and outdoor use. The system includes protective covers, curves, elbows, level changes, and robust suspension and support brackets. VIAFIL trays comply with CEI 61537 standards for electrical continuity and are designed for demanding industrial and commercial installations .

Key Features to Consider
• Material & Finish: Steel, stainless steel (AISI 304/316), or galvanized options for corrosion resistance.

• Ventilation: Open mesh design promotes airflow to prevent cable overheating.

• Ease of Installation: Self-coupling ends, inlaid fittings, and modular accessories simplify assembly.

• Versatility: Suitable for indoor/outdoor use, complex routing, and heavy cable loads.

• Safety: Rounded or sloping edges reduce risk of cable damage and installation injuries. By choosing suppliers like Legrand Cablofil, Grainger, or Interflex USA, you can ensure access to high-quality, standard mesh cable trays with reliable performance, versatile installation options, and comprehensive accessory support.
