Which brand of fiber optic patch cord is generally the best

Overview

To determine what connector you will need, you need to examine the device ports you'll be connecting, and you need to know what applications will utilize the cord. Fiber optic patch cords come with different connectors to plug into different devices. If th. To determine what connector you will need, you need to examine the device ports you'll be connecting, and you need to know what applications will utilize the cord. Fiber optic patch cords come with different connectors to plug into different devices. If the devices you are connecting have the same connector port, you'll want to select a: 1. LC-LC 2. The next thing your need to determine is which fiber patch cable mode is best for your application. The two modes available are single-mode or multimode.This is pretty straightforward. You'll need to know the distance between your devicesand then select the cable length that you need. Fiber optic patch cable ranges in lengths between 0.5m – 50m. The most common lengths are: 1. 1m 2. 5m 3. 10m 4. 20m 5. 30m 6. 50mFinally, you'll need to decide on the connector polish and cable jacket, which can affect the cable's performance.
