Xiaomi 11u Fiber Optic Sensor

Overview

Fiber-optic sensors are highly significant in modern technology due to their unique abilities and versatility [1, 2, 3].

Key Takeaways

The Xiaomi 11u Fiber Optic Sensor refers to the FU-45X model, an industrial-grade fiber optic sensor designed for high-precision detection and monitoring applications.Overview

The FU-45X fiber optic sensor is manufactured by Xiamen Xinjiecheng Technology Co., Ltd., a company specializing in industrial components. It is designed to provide reliable and efficient sensing solutions for various industrial environments, ensuring high accuracy and durability . The sensor is suitable for applications where precise detection of light changes along optical fibers is required.

Key Features
• High-Quality Industrial Design: Built to meet international standards for reliability and performance .

• Advanced Detection: Capable of detecting minute changes in light transmitted through optical fibers, making it suitable for monitoring machinery, pipelines, or security perimeters.

• Flexible Installation: Can be integrated into existing systems with standard industrial interfaces.

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Global Availability: The manufacturer supports international shipping and trade assurance, with multiple payment options including T/T, Western Union, Visa, and Mastercard .
Applications

The FU-45X sensor is commonly used in:

• Industrial Automation: Monitoring equipment and production lines for precise operational feedback.

• Security Systems: Detecting intrusions or disturbances along fiber optic cables, similar to perimeter intrusion detection systems like the FiberPatrol FP1150 .

• Pipeline and Conduit Monitoring: Ensuring integrity and detecting tampering or environmental changes along buried or exposed pipelines.
Purchasing and Support

Orders are processed Monday through Friday, with logistics handled efficiently to ensure timely delivery. The company emphasizes quality, innovation, and customer-centric service, making it suitable for industrial clients seeking reliable fiber optic sensing solutions . In summary, the Xiaomi 11u Fiber Optic Sensor (FU-45X) is a high-precision, industrial-grade sensor designed for applications requiring accurate detection along optical fibers, with robust support and international availability.
